

FACIAL ASTHETIC - REHABILITATION AFTER LOST EYE

VIJAY NAGLE
OPTOMETRIST & OCULARIST
DRISHTI INDIA OCULAR PROSTHESIS AND VISION CENTRE

“Eyes” are the most important part of the facial beauty and generally the first feature of the face to be noted.

An unfortunate loss or absence of an eye May be caused by a congenital defect, irreparable trauma, tumors, pain full blind eye

The disfigurement associated psychological and emotional problem. Most patient experience significant stress, primarily due to adjustment to the functional disability caused by the loss and to societal reaction to the facial important.

According to the Society for the Prevention of Blindness, between 10,000 and 12,000 people per year lost an eye. Though 50% or more of these eye losses are caused by an accident (in one survey more males lost their eyes to accidents compared to females)

So Remember...

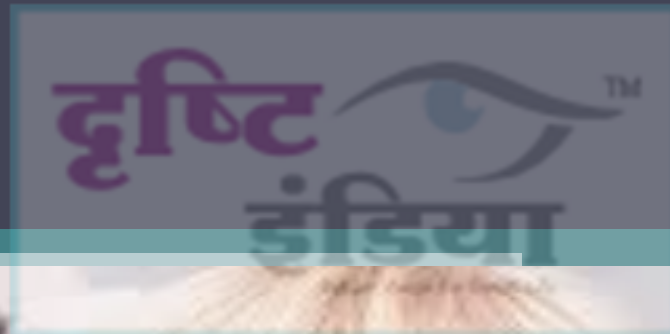

So Remember...

This situation will not change
without your help.

Protection of eyes are very important.

For disfigured eye Custom Made Ocular prosthesis plays very important role not only in cosmetic rehabilitation but also to regain self-confidence and to resume normal life.

There is no age bar for fitting of prosthesis so prosthesis should be fitted at appropriate time to prevent socket complications.

Acknowledgement

To all the patients seen in the presentation

THANK YOU
